

```

initialize
super initialize.
self lock: Lock new
  
```

```

syncRead
| value |
self lock acquire.
value := self read.
self lock release.
^ value
  
```

```

syncWrite
| value |
self lock acquire.
value := self write.
self lock release.
^ value
  
```

Duplicated code

Use of trait

<b>TSyncReadWrite</b>	
initialize syncRead syncWrite	<i>read</i> <i>write</i> lock: lock
